Some countries (such as the USA) will not allow anyone with a cybercrime record to enter the country

A possible prison sentence

Not being allowed a bank account

Resource 2: Who can help scenarios

Bobbie is refusing to play online games with his friends. He says he has real friends now and that online gaming is for little kids.

Bobbie's parents have become suspicious that he is spending a lot of time alone on his laptop in his room. When they checked his internet search history, it was empty.

Bobbie's ICT teacher notices that Bobbie has asked some very detailed questions in lessons about coding that are way beyond the skills of the rest of the class.

The police have been informed by a local bank that there have been 25 attempts to hack into the bank's computer system from the same source.

Resource 3: Comparing online and off-line crime

How might each person have felt after their experience?

Person A:

Person B:

What financial consequences might each person experience?

Person A:

Person B:

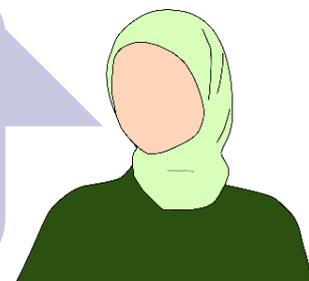

Person A

A few months ago my personal computer was hacked, and my identity was stolen. The person deleted important documents I'd been working on for months, and made online payments without me knowing.

Person B

Last year my house was burgled. Someone broke in and took valued possessions such as jewellery, my electronics and some savings I was keeping at home.

What security issues might each person have to put in place in future?

Person A:

Person B:

What practical inconveniences might have affected each person?

Person A:

Person B:

What are the similarities and differences between online and off-line crime?
